that Rao discloses an "application server." However, without the disclosure of an application server, or at least the disclosure of how the Rao invention would be applicable thereto, the "switch" of Rao fails to fully disclose the limitations of any of Applicants' claims.

Rao Is Not Directed To Servicing Multiple Service Providers

Another important distinction between Applicants' invention and Rao is the ability of Applicants' invention to "enable different business entities to offer services from the same application server without losing control over call handling" (paragraph 10). Applicants' application server can, for example, "offer services to both Verizon and Sprint subscribers" (paragraph 25). Such servicing of multiple service providers would not be possible in Rao's switch, wherein different service providers would, by definition, lose control over call handling.

In an effort to highlight this additional distinction of handling calls for multiple service providers, and to obtain claim protection to which Applicants believe they are entitled, new claims 24-31 have been added.

Conclusion

Applicants consider the Response herein to be fully responsive to the referenced Office Action. Based on the above Remarks, it is respectfully submitted that, since Rao does not disclose an application server, or provide any indication of applicability to an application server, it cannot be anticipatory of Applicants' claims. Accordingly, withdrawal of the rejection is respectfully requested and allowance requested. If there are any remaining issues or the Examiner believes that a telephone conversation with Applicants' attorney would be helpful in expediting the prosecution of this application, the Examiner is invited to call the undersigned at (972) 718-4800.

Respectfully submitted,

Date: April 21, 2005
